PROJECTS

AI Code Review System | Python, Flask, SQLite, API keys 2026
Full-stack web application |

- Developed a full-stack web application that automates source code analysis using AI, identifying bugs, security vulnerabilities, and coding standard violations.
- Integrated OpenAI GPT and Anthropic Claude APIs to generate detailed code review reports, including severity classification (Critical, High, Medium, Low), fix suggestions, corrected code, and quality scores.
- Implemented user authentication, file upload functionality, analysis history tracking, and a fallback static analysis engine using Flask and SQLite.

Personal Developer Portfolio | React js, Vite, Javascript, HTML5, CSS3 2026
Personal Portfolio | portfolio-one-beta-68.vercel.app

- Developed a responsive personal portfolio website to showcase technical skills, projects, certifications, and professional profiles using React.js and Vite.
- Implemented modern UI features including dark/light mode, smooth navigation, responsive layouts, and interactive components for an enhanced user experience.
- Deployed the application on Vercel with a focus on performance, accessibility, and professional presentation for recruiters and hiring managers.
